

GEOVANNY HERNANDEZ

DATABASE ENGINEER

ABOUT ME

Being a Database Engineer represents a very challenging role, but I really enjoy aspects of databases like performance tuning and optimization, database design, and automation of processes as deployments and unit testing. I have plenty of experience in relational databases like MS SQL Server and MySQL as well in NoSQL like Cassandra which allow me to identify proper scenarios for each of these technologies, finally, I can describe myself as a Software Craftsman and passionate for clean code.
